

SESHAT TEST WAVE – MOCK PDF (TEST DOCUMENT)

=====

Date : 2026-06-18
Project : test
Author : Alberto Esperon
Status : DRAFT / TEST MATERIAL

This PDF is a synthetic document generated for the SESHAT test wave on the repository /Applications/MAMP/htdocs/test. Its purpose is to exercise seal_file() on a binary PDF payload and verify:

1. that the SHA-512 fingerprint computed by SESHAT matches the one produced by `shasum -a 512` on the same file (algorithm transparency);
2. that the vault copy in ~/.seshat/vault/test/ is byte-identical to the original (vault integrity);
3. that the eIDAS contribution at IP Secure (Menezis project) is created with a real ipsecure_contribution_id (no F-NEW-4 silent skip).

Section A – Synthetic content

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat.

Section B – Verification checklist

[]	sha512 fingerprint matches shasum -a 512
[]	vault copy is bit-identical
[]	ipsecure_contribution_id is non-null
[]	ledger_id is returned by the seal_file response
[]	reference encoding (F-NEW-7) is consistent between API and ledger

Section C – Non-attribution disclaimer

This document is entirely fictional. It contains no real research findings, no third-party content, no copyrighted material, and no personally identifying information beyond the author's own name and the test project metadata. Sealing it does not constitute a research claim under any intellectual property regime.

End of document.
