

=====
Date : 2026-06-19
Project : test
Author : Alberto Esperon
Status : DRAFT / TEST MATERIAL
Version : SESHAT 1.5.4

This PDF is a synthetic document generated for the second wave of the SESHAT test campaign on the repository /Applications/MAMP/htdocs/test. Its purpose is to exercise seal_file() on a binary PDF payload under SESHAT 1.5.4 and verify:

1. that the SHA-512 fingerprint computed by SESHAT matches the one produced by `shasum -a 512` on the same file (algorithm transparency);
2. that the vault copy in .seshat/sealed/ is byte-identical to the original (vault integrity);
3. that the eIDAS contribution at IP Secure (Menezis project) is created with a real ipsecure_contribution_id (track F-NEW-11 status);
4. that the response sealed_path field is now populated (F-NEW-8 fixed);
5. that the response ipsecure_status field distinguishes "submitted" from "anchored" if the maintainer has acted on report #48.

Section A – Synthetic content

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat. Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolore eu fugiat nulla pariatur.

Section B – Verification checklist (1.5.4)

[] sha512 fingerprint matches shasum -a 512
[] vault copy is bit-identical
[] ipsecure_status reported correctly (submitted vs anchored)
[] ledger_id returned by seal_file response
[] reference encoding stable between API and ledger (F-NEW-7)
[] no F-NEW-9 commit_sha:null regression
[] auto-commit pair entry created in ledger (F-NEW-10 healthy)

Section C – Non-attribution disclaimer

This document is entirely fictional. It contains no real research findings, no third-party content, no copyrighted material, and no personally identifying information beyond the author's own name and the test project metadata. Sealing it does not constitute a research claim under any intellectual property regime.

End of document.
